

In the claims:

Pursuant to 37 C.F.R. 1.121(c), please amend claim 2 as indicated below. A complete listing of all claims in the application is provided immediately below.

COMPLETE LISTING OF ALL CLAIMS IN THE APPLICATION

1. (Previously presented) A splicing cassette management system for an optical waveguide distribution cabinet, comprising two or more splicing cassettes which are arranged in a splicing cassette holder mounted on a withdrawable mounting device and can be moved together with the mounting device on a first plane, and in that the splicing cassette holder can be pivoted from the first plane to a second plane.
2. (Currently amended) The splicing cassette management system as claimed in claim 1, wherein the second plane ~~runs~~ is approximately at a ~~right angles~~ angle to the first plane.
3. (Previously presented) The splicing cassette management system as claimed in claim 1 wherein the withdrawable mounting device is mounted in a housing via guide rails, and in that the splicing cassette holder can be withdrawn from the housing together with the mounting device via the guide rails on two opposite sides of the housing.
4. (Previously presented) The splicing cassette management system as claimed in claim 3, wherein the mounting device is in the form of a drawer.
5. (Previously presented) The splicing cassette management system as claimed in claim 1, wherein the splicing cassette holder has a pivoting device on one of its sides, in which case the splicing cassette holder is mounted on the mounting device via the pivoting device and can be folded from the first plane to the second plane.
6. (Previously presented) The splicing cassette management system as claimed in claim 5, wherein the pivoting device is in the form of a latching joint.
